**PROMOTING HIGH-QUALITY DIGITAL EDUCATION IN GEORGIA**

Empowering Students: Personalization, Flexibility, and  
Employability through Digital Education  
Training on Digital Education in Higher Education – Day 2

Tallinn University of  
Technology (TalTech)

1 Understand how digital education can support personalized learning paths for students.

2 Explore the role of flexibility in meeting diverse student needs.

3 Discuss strategies for enhancing student employability through digital platforms.

*What do you think students value most in digital education?*

## Personalization

- Adaptive learning technologies provide individualized feedback and support.
- Modular courses allow students to build skills at their own pace.

## Flexibility

- Asynchronous learning allows students to access materials anytime, anywhere.
- Hybrid models blend online and in-person learning to suit various needs.

## Employability Enhancement

- Skill-based certifications demonstrate students' proficiency in in-demand skills.
- Digital platforms connect students with internships and industry mentors.

You will work together in groups to design a plan for a student's ideal digital education journey that provides answers:

- How can digital tools help?
- What are the benefits for students?
- What challenges might arise, and how can they be addressed?

Each group will focus on one of the three areas: personalization, flexibility or employability.

What is one key takeaway from this session that could improve student outcomes in your institution?

# THANK YOU !
